Own a slice of Silicon Valley! This profitable wafer fab house has made silicon wafers for 20+ years. A large, loyal base of customers includes major semiconductor manufacturers, US government agencies, R&D houses, and universities. Management, technical sales, and trained machine operators are in place for a smooth transition of this turn-key operation. The primary product is Silicon on Insulator (SOI) wafers in diameters up to 200mm. The 12,000+ sf facility includes a Class 10 clean room. The owners are retiring. Now is the time to buy this money maker as there is an industry-wide shortage of manufacturing capacity for silicon wafers. BTI#8579
